

# Valemount

## THE TEAM

Residents will be fully integrated into the clinical team alongside all team members. The learning environment will be tailored to the specific resident depending on their learning goals. Situated on a busy highway, with a well-known mountain bike park in the summer, and multiple heli ski operations and an extensive snowmobile network in the winter, we are quite busy with various orthopedic and trauma injuries.

The community has long-term physicians who are committed to the community and to rural practice in British Columbia. There are provincial leaders within this group, and physicians with unique interests. Strong and unique mentorship opportunities are available.

Some of our physicians are new to practice, some are more seasoned. We are a mix of physicians with an international background and physicians who completed residency in British Columbia.

## THE TOWN

Surrounded by snowcapped mountains and crystal clear lakes, Valemount is situated close to the Alberta border and the highway to Kamloops. Valemount area is the traditional Territory of the Simpcw First Nation.

Valemount is a small community that is closely connected to neighbouring community McBride. The two communities share many services and work together to support residents.

Valemount has a community center with an indoor gym, climbing wall, curling rink, and hockey rink. In the winter snowmobiling, backcountry skiing, snowshoeing, cross-country skiing, curling, skating and hockey are common activities. In the summer, residents enjoy mountain biking, hiking, boating and swimming.

The local arts community hosts concerts/plays, occurring year round! The scenic views will inspire you along with the friendly and vibrant community.
